1. Introduction

Website Topic – “Football Corner”

Team Members

1. Chiran Ranatunga 2018814 (Group Leader)
2. Anushka Alwis 2018088
3. Sahan Liyangaskumbura 2018819
4. Karthikeyan Nishenthana 2018844

2. Technical Discussion

Student Number – Student 03

Task 1 – Making the Quiz

Approach taken

1. The quizzes and the answers were stored in JavaScript objects
2. The command / manipulation buttons were made using HTML and styled by CSS
3. Division contain the questions and timer and styled by CSS to get user attracted.
4. The quizzes were extracted from Online medium. (www.jagranjosh.com)

Implementation

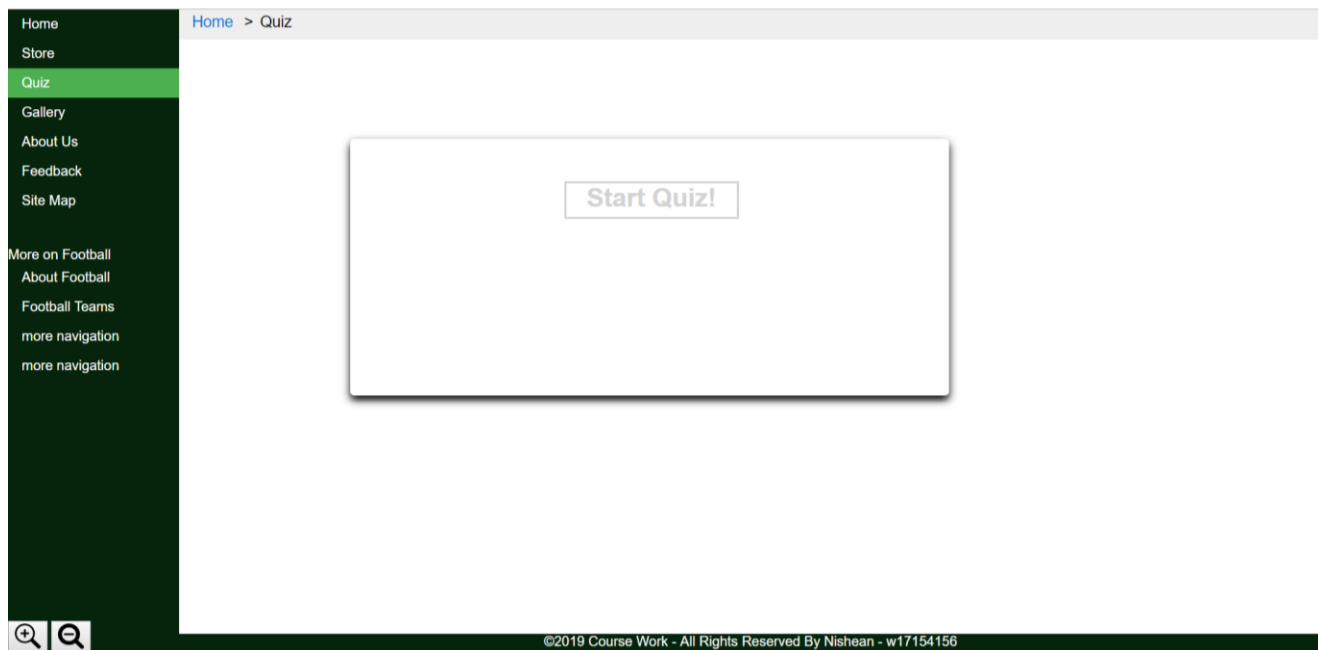

1. Quizzes are in JavaScript objects. JavaScript functions are used to call the objects.
2. The interval to call/ display the questions is 10 seconds.
3. The user’s mouse clicks are assigned as functions and assigned to JavaScript objects
4. “Correct” answer increases the “correct counter, “incorrect” answer increases the “incorrect counter”
5. Correct answers changes the circle (progression bar) colour to green, incorrect is shown in red. “If” conditions are used in this procedure.
6. Correct answers are allocated 2 marks each. Incorrect marks are allocated -1 mark each.
7. To get the score percentage as a whole number math.round method is used.
8. Background colour changes according to marks as follows, Marks>50 = Green colour | Marks<50 Red colour.
9. The Ternary operator is used to determine the background colour.
10. Finally, Student 1’s “Font size incrementor” was added to this page.

Difficulties and solving strategy

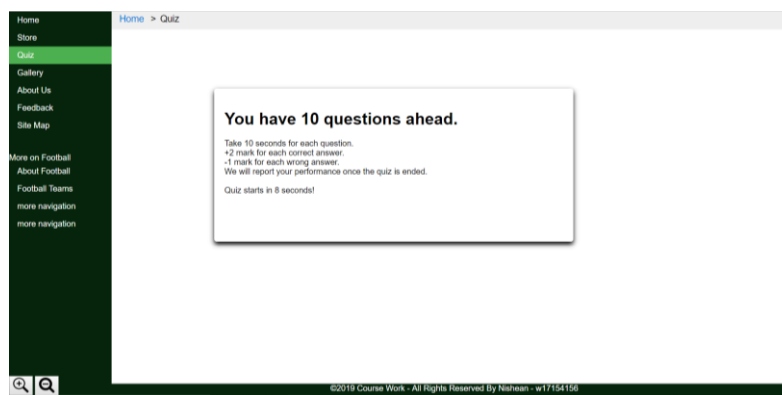

Difficulty	Solving Strategy
Figuring out the quiz answer option alignment strategy	Initial idea was to implement it based on waterfall alignment method. Later discussions with Sahan lead to display the quiz options horizontally aligned so that it adheres to standard UI principles.
Problem of displaying marks as minus values (The question “is it a standard practice?” was raised)	Display the marks as “0” if it comes to minus as a standard. But display the minus value for the user in terms of awareness.

Screenshots

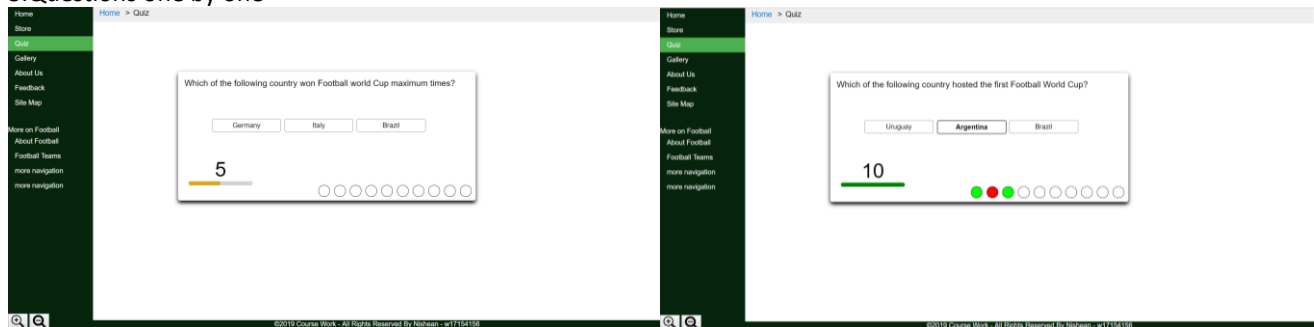

1.Interface

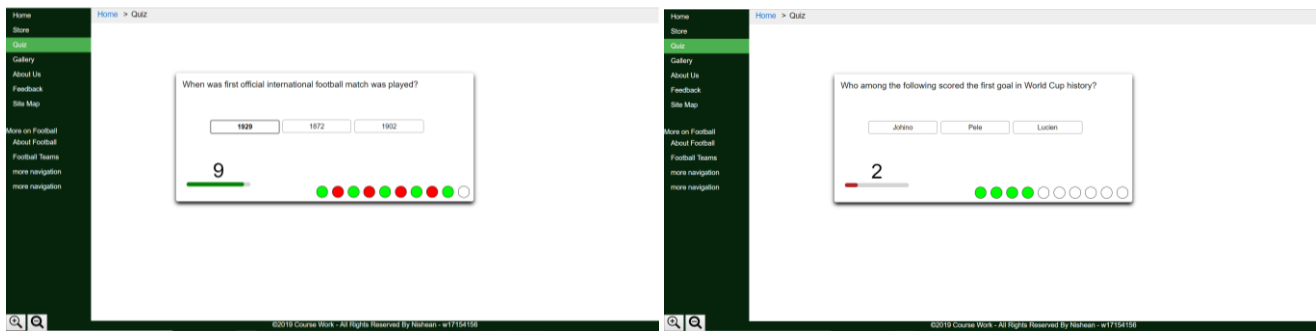

2.After Clicking “Start Quiz!” button.

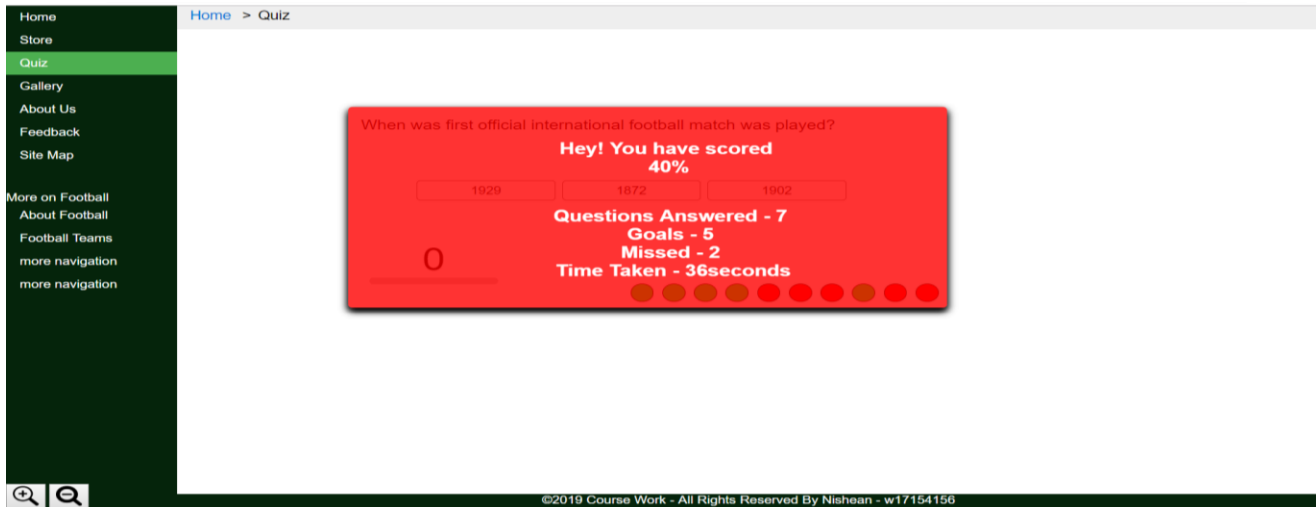

3.Questions one by one

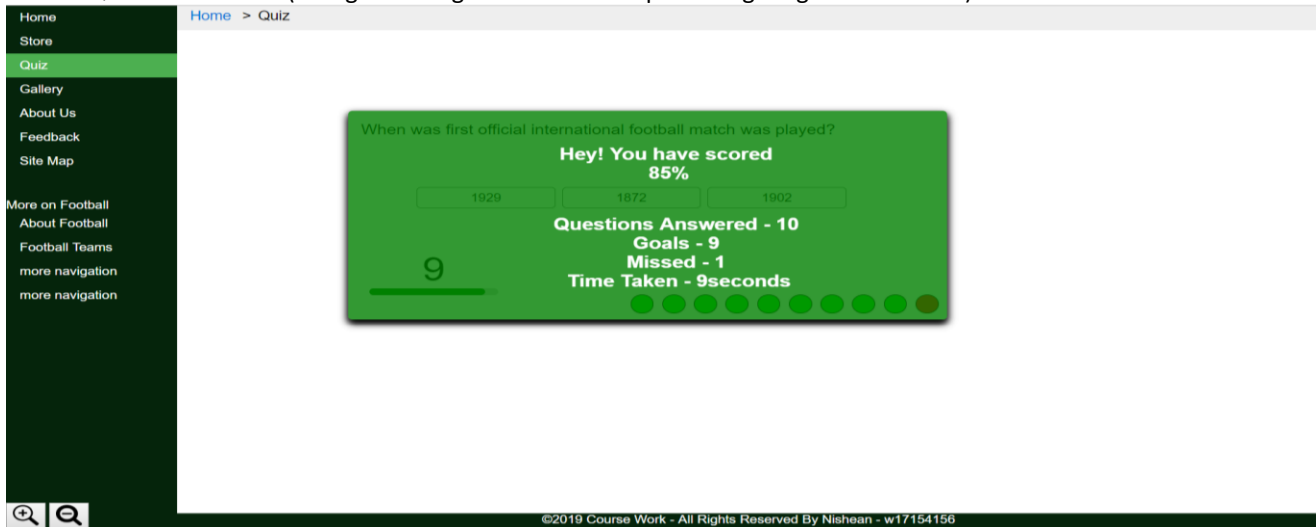

4.After Question finishes. (background is red since score percentage is less than 50)

5.After Question finishes. (background is green since score percentage is greater than 50)

    document.body.style.fontSize = parseFloat(document.body.style.fontSize) + pixels +
"em";
}

```

Task 2 – Student Details Page

Approach taken

1. Mouse over and mouse and mouse out events are used to trigger the show description function

Implementation

1. The four pictures were displayed using CSS “float” method.
2. Mouse over and mouse and mouse out events are used to trigger the show description function.
3. Switch cases are used to determine the mouse pointer.

Difficulties and Solving Strategy

Difficulty	Solving Strategy
Avoiding white spaces	Using background image to counter the excess white space

Screenshots

    }
}
```

Task 3 – CV

Approach Taken

1. HTML was used to display the content
2. CSS was used for styling and alignment
3. The content was taken from the existing personal CV already created.

Implementation

1. The above approach was taken to assign the correct content to each section and align them accordingly.

Difficulties and Solving Strategy

Since we already did our tutorials, we didn't face issues on making a web CV.

Task 4 – About Football

Approach Taken

1. HTML was used to display the content about a brief explanation on football and rules
2. CSS was used for styling and alignment.
3. The content was taken from internet. (www.slideshare.net)

Implementation

1. Since this is a page with lots of information, I have used Pictures in between to make user easy about the content.

Difficulties and Solving Strategy

<div id="pageContainer">
<div id="aboutFootball">
<div id="history">
<h2> History of Football</h2>
<div>
<p class="p1">
The contemporary history of the world's favourite game spans more than 100
years. It all began in 1863 in England, when rugby football and association football
branched off on their different courses and the Football Association in England was
formed - becoming the sport's first governing body.
</p>

<p class="p2">
Both codes stemmed from a common root and both have a long and intricately
branched ancestral tree. A search down the centuries reveals at least half a dozen
different games, varying to different degrees, and to which the historical development of
football has been traced back. Whether this can be justified in some instances is
disputable. Nevertheless, the fact remains that people have enjoyed kicking a ball
about for thousands of years and there is absolutely no reason to consider it an
aberration of the more 'natural' form of playing a ball with the hands.
</p>

```

<p class="p3">

On the contrary, apart from the need to employ the legs and feet in tough tussles for the ball, often without any laws for protection, it was recognised right at the outset that the art of controlling the ball with the feet was not easy and, as such, required no small measure of skill. The very earliest form of the game for which there is scientific evidence was an exercise from a military manual dating back to the second and third centuries BC in China.

</p>

<p class="p4">

This Han Dynasty forebear of football was called Tsu' Chu and it consisted of kicking a leather ball filled with feathers and hair through an opening, measuring only 30-40cm in width, into a small net fixed onto long bamboo canes. According to one variation of this exercise, the player was not permitted to aim at his target unimpeded, but had to use his feet, chest, back and shoulders while trying to withstand the attacks of his opponents. Use of the hands was not permitted.

</p>

<p class="p5">

Another form of the game, also originating from the Far East, was the Japanese Kemari, which began some 500-600 years later and is still played today. This is a sport lacking the competitive element of Tsu' Chu with no struggle for possession involved. Standing in a circle, the players had to pass the ball to each other, in a relatively small space, trying not to let it touch the ground.

</p>

<p class="p6">

The Greek 'Episkyros' - of which few concrete details survive - was much livelier, as was the Roman 'Harpastum'. The latter was played out with a smaller ball by two teams on a rectangular field marked by boundary lines and a centre line. The objective was to get the ball over the opposition's boundary lines and as players passed it between themselves, trickery was the order of the day. The game remained popular for 700-800 years, but, although the Romans took it to Britain with them, the use of feet was so small as to scarcely be of consequence.

Website Structure

Our website is always well accessible and no complication at all, It's all because of our navigation bar which is fixed at left of each and every page of us with relevant and identical.

Navigation bar is available in – Quiz page, About Us page, About Football page.

According to specification, I have done the in-page navigation in about football page since it have got some content to look for.

User can get to the content using the in-site navigation which has in-site anchors to get to a specific section of a page.

b. Code to achieve good Information architecture

HTML - Navigation

```
<ul id="navigation">
  <li><a href="../index.html" onclick="selectMenuItem(this)">Home</a></li>
  <li><a href="../Student 1/marcketPlace.html"
onclick="selectMenuItem(this)">Store</a></li>
  <li><a href="quiz_page.html" onclick="selectMenuItem(this)">Quiz </a></li>
  <li><a href="../Student 4/8/8.html" onclick="selectMenuItem(this)">Gallery</a></li>
  <li><a href="details_page.html" onclick="selectMenuItem(this)">About Us</a></li>
  <li><a href="../Student 2/comment.html"
onclick="selectMenuItem(this)">Feedback</a></li>
  <li><a href="../Student 4/6/6.html" onclick="selectMenuItem(this)">Site
Map</a></li>
  <br> <br>
  More on Football
  <li><a class="active">About Football</a></li>
  <li><a href="" onclick="selectMenuItem(this)">Football Teams</a></li>
  <li><a href="" onclick="selectMenuItem(this)">more navigation</a></li>
  <li><a href="" onclick="selectMenuItem(this)">more navigation</a></li>
</ul>
```

CSS - Navigation

```
body {  
  margin: 0px;  
  font-size: 100%;  
  font-family: 'Roboto', sans-serif;  
}  
  
ul {  
  list-style-type: none;  
  margin: 0;  
  padding: 0;  
  width: 200px;  
  background-color: #05240B;  
  position: fixed;  
  height: 100%;  
  overflow: auto;  
  color: #fff;  
}

  display: block;  
  color: #fff !important;  
  padding: 8px 16px;  
  text-decoration: none;  
}  
  
li a.active {  
  background-color: #4CAF50;  
  color: white;  
}  
  
li a:hover:not(.active) {  
  background-color: #555;  
  color: white;  
}
```

HTML - In-site Navigation

```
<div id="sideContainer">
  <center>This Page Has</center>
  <br> <br>
  <a href="#history">History of Football</a> <br>
  <ul>Rules and Regulations
    <li><a href="#rule1">Ball In and Out of Play</a></li>
    <li><a href="#rule2">Method of scoring</a></li>
    <li><a href="#rule3">Offside</a></li>
    <li><a href="#rule4">Fouls and Misconducts</a></li>
    <li><a href="#rule5">Free Kicks</a></li>
    <li><a href="#rule6">Penalty Kick</a></li>
    <li><a href="#rule7">Throw-In</a></li>
    <li><a href="#rule8">Goal Kick</a></li>
    <li><a href="#rule9">Corner Kick</a></li>
  </ul>
</div>
```

CSS- In-site Navigation

```
#sideContainer{
  width: 200px;
  position: absolute;
  margin: 0px;
  padding: 0px;
  right: 0px;
  top: 0px;
  background-color: #05240B;
  height: 670px;
  overflow: auto;
  color: #fff;
}

#sideContainer ul{
  padding-left: 4px;
}

#sideContainer ul li a::before{
  counter-increment: rulesNav;
  content: counter(rulesNav) ". ";
}

#sideContainer a{
  display: block;
  color: #fff !important;
  padding: 8px 4px;
  text-decoration: none;
}
```

```
#sideContainer a:hover {  
    background-color: #555;  
    color: white;  
}  
  
#sideContainer li a {  
    padding: 8px 16px;  
}
```

3.2 Colour balance/composition/graphics/consistency

a. Design

Used colour combination – Green, White, Grey

Reasons

Green – Symbolizes the colour of a football field

White and Grey – Contrasting colours of green

Composition

Navigation component is the left most part in all pages and all-important component lies in centre to get the first sight of user with footer covering the bottom part of all pages. This is followed consistently.

Graphics

Images from internet was our prime source of graphics because our scope is not entirely on photos editing. Though we have got images that matches our pick of our theme that is Green, Grey and White.

I have used border shadow effect of CSS mostly to show the graphics on container divisions. (Quiz container, CV container, About us Image Container)

Quiz page has time gauge which reminds the time left to user to that specific question. If seconds remaining is more than 5seconds, the colour to show is Dark Green and Dark Orange indicates when seconds remaining is between 3 to 5 and Red Gauge is when the seconds remaining is less than 3.

In Quiz page, I show a progression bar to user in circle shape with black border which shows user whether the answer is correct (Green) or wrong (Red) and remaining (White) question.

Details page was kind of blank after only inserting all of our images alone, So we discussed and finalised to have an image so it covers some part on background.

Hover effects on buttons/links is followed all through the clickable links.

Visual Balance

Use of Dark and light colours is made easy by one of our theme colour Grey, So it gives user a good balance on visual.

Legibility

The universal font attributes such as family, size and colour provides legibility to the web pages.

Footer

Footer with a dark background and white fonts with my CV is there in all pages created by me.

b. Code to achieve good colour balance & ensure consistency

Navigation - Colour

```
ul {  
    background-color: #05240B; /*Dark Green*/  
    color: #fff; /*white*/  
}
```

Footer – Colour

```
#footer{  
    color: white;  
    background-color: #05240B;  
}
```

Side-Navigation – Colour

```
#sideContainer{  
    background-color: #05240B;  
    color: #fff;  
}
```

Quiz Container – shadow

```
#qContainer{  
    box-shadow: 0px 5px 15px black;  
    /* box shadow takes default color of content */  
    /*but safari requires color to display shadow */  
}
```

Colour Change- Time Gauge of Quiz page

```
if (count <= 3) {  
    document.getElementById("timeBar").style.backgroundColor = "#B22222"; /*Dark Red  
} else if(count <= 5){  
    document.getElementById("timeBar").style.backgroundColor = "#DAA520"; /*Dark Orange  
}else {  
    document.getElementById("timeBar").style.backgroundColor = "#008000"; /*Dark Green  
}
```

3.3 Typography / consistency

a. Design

Font Used – Roboto (and sans-serif if roboto doesn't support)

Default font sizes – Commonly default (Fonts are responsive to change)

Used default elements such as <h3> and <h2> tags of HTML to show differences between title and sub title.

b. Code to achieve good typography / consistency

```
body{  
  font-family: 'Roboto', sans-serif;  
}
```

3.4 Gestalt principles grouping

Principle 1 – Similarity

The font patterns used are similar in titles and descriptions of similar sections.

The border colours and background colours are similar in each sub section.

The border sizes are similar in each sub section

The font family and sizes are similar in each sub section.

Above strategies are used to maintain and present similarity of the website to the user.

Principle 2 – Proximity

The spaces of the web page is balanced to maintain proximity between each sub section.

There's a defined consistent gap between each section.

The sub sections are aligned in the grid schema vertically and horizontally in pre-defined consistent sizes, therefore maintaining proximity.

Principle 3 – Closure

Colour differentiation is used to maintain closure between each section. Contrasting colours are used so that each section is easily visible and does not visually overlap with other sections,

Visible borders are used to maintain closure in section where necessary.

The background images used are different in each section therefore helps to maintain closure..

Principle 4 – Continuance

The main page and the feedback form content flow downwards in direction. Therefore the downward directional architecture helps in continuing the content flow.

The navigation panel helps to navigate to different pages of the website and also uses the downward directional architecture.

Screen Shots

Browser window showing the "About Football" page. The URL is `D:/02.WebDev/Semester_1/Coursework01/WebGroupCoursework/Student03/About_football.html`.

Rules and Regulations

1. Ball in and out of Play

The soccer ball is out of bounds when it has crossed the goal line or touchline whether on the ground or in air. If it rebounds off the referee, an assistant referee, a goal post, crossbar, or corner flag post and remains inside the field, then it is still in play.

2. Method of scoring

A goal is scored in football if the ball crosses the goal line between the two goalposts and under the crossbar, as long as no violation of the rules has taken place. The side that scores the most goals wins. If both teams have the same number of goals at the end of the match, it is considered a draw even if neither of them scored a goal.

3. Offside

A player is in offside position if there are fewer than two defenders (including the goalie) between him and the goal line. A violation of the offside rule in football occurs if he is in that position and the ball is played to him.

3.5 Accessibility (graphics/forms)

a. Graphical elements - Design/Code

Font Size increment and decrement is used so people with some vision disability could access the website.

Alternate Font family is used.

Colours of theme is picked checking the vision problems.

Alternate image messages in case of image load failures is done.

b. Form completion - Design/Code

Form Completion was not assigned for Student-03 in specification. And did not required on specified tasks

4 Janet

Policy 1 – Acceptable Use Policy

- All extracted images are given sources in the references section.
- No offensive or unrated material is used or presented in the web site.
- 3rd party advertisements are not used in any form

Policy 2 – Local Acceptable Use Policy

- The website is malware and virus free
- The web pages load on standard internet broadband speeds.
- The user data are not given away from the website or sol to third parties therefore is secure and confidential.
- The entire website is backed up in a github repository in case of failure

Policy 3 - Legal Requirements

- adheres to the law relating to third party access of data since third parties are not allowed to view data
- Malicious communications does not happen in the web site and pages (adheres to the malicious communications act 1988)

5 Conclusions

The Overall experience gained is always helpful throughout my carrier since it is a work mostly related with UI and UX which is so much important as a developer to develop inside to attract user in all ways.

Working with a wonderful team always gives us pleasure to be a part and everyone was helpful and shared knowledge from the start till end.

            <h2> History of Football</h2>
            <div>
                <p class="p1">
                    The contemporary history of the world's favourite game spans more than
                    100 years. It all began in 1863 in England, when rugby football and association
                    football branched off on their different courses and the Football Association in
                    England was formed - becoming the sport's first governing body.
                </p>

                <p class="p2">
                    Both codes stemmed from a common root and both have a long and
                    intricately branched ancestral tree. A search down the centuries reveals at least
                    half a dozen different games, varying to different degrees, and to which the historical
                    development of football has been traced back. Whether this can be justified in some
                    instances is disputable. Nevertheless, the fact remains that people have enjoyed
                    kicking a ball about for thousands of years and there is absolutely no reason to
                    consider it an aberration of the more 'natural' form of playing a ball with the
                    hands.
                </p>

                <p class="p3">
                    On the contrary, apart from the need to employ the legs and feet in tough
                    tussles for the ball, often without any laws for protection, it was recognised right
                    at the outset that the art of controlling the ball with the feet was not easy and, as
                    such, required no small measure of skill. The very earliest form of the game for
                    which there is scientific evidence was an exercise from a military manual dating back
                    to the second and third centuries BC in China.
                </p>

```

<p class="p4">

This Han Dynasty forebear of football was called Tsu' Chu and it consisted of kicking a leather ball filled with feathers and hair through an opening, measuring only 30-40cm in width, into a small net fixed onto long bamboo canes. According to one variation of this exercise, the player was not permitted to aim at his target unimpeded, but had to use his feet, chest, back and shoulders while trying to withstand the attacks of his opponents. Use of the hands was not permitted.

</p>

<p class="p5">

Another form of the game, also originating from the Far East, was the Japanese Kemari, which began some 500-600 years later and is still played today. This is a sport lacking the competitive element of Tsu' Chu with no struggle for possession involved. Standing in a circle, the players had to pass the ball to each other, in a relatively small space, trying not to let it touch the ground.

</p>

<p class="p6">

The Greek 'Episkyros' - of which few concrete details survive - was much livelier, as was the Roman 'Harpastum'. The latter was played out with a smaller ball by two teams on a rectangular field marked by boundary lines and a centre line. The objective was to get the ball over the opposition's boundary lines and as players passed it between themselves, trickery was the order of the day. The game remained popular for 700-800 years, but, although the Romans took it to Britain with them, the use of feet was so small as to scarcely be of consequence.

History of Football

The contemporary history of the world's favourite game spans more than 100 years. It all began in 1863 in England, when rugby football and association football branched off on their different courses and the Football Association in England was formed - becoming the sport's first governing body.

Both codes stemmed from a common root and both have a long and intricately branched ancestral tree. A search down the centuries reveals at least half a dozen different games, varying to different degrees, and to which the historical development of football has been traced back. Whether this can be justified in some instances is disputable. Nevertheless, the fact remains that people have enjoyed kicking a ball about for thousands of years and there is absolutely no reason to consider it an aberration of the more 'natural' form of playing a ball with the hands.

On the contrary, apart from the need to employ the legs and feet in tough tussles for the ball, often without any laws for protection, it was recognised right at the outset that the art of controlling the ball with the feet was not easy and, as such, required no small measure of skill. The very earliest form of the game for which there is scientific evidence was an exercise from a military manual dating back to the second and third centuries BC in China.

This Han Dynasty forebear of football was called Tsu' Chu and it consisted of kicking a leather ball filled with feathers and hair through an opening, measuring only 30-40cm in width, into a small net fixed onto long bamboo canes. According to one variation of this exercise, the player was not permitted to aim at his target unimpeded, but had to use his feet, chest, back and shoulders while trying to withstand the attacks of his opponents. Use of the hands was not permitted.

Another form of the game, also originating from the Far East, was the Japanese Kemari, which began some 500-600 years later and is still played today. This is a sport lacking the competitive element of Tsu' Chu with no struggle for possession involved. Standing in a circle, the players had to pass the ball to each other, in a relatively small space, trying not to let it touch the ground.

The Greek 'Episkyros' - of which few concrete details survive - was much livelier, as was the Roman 'Harpastum'. The latter was played out with a smaller ball by two teams on a rectangular field marked by boundary lines and a centre line. The objective was to get the ball over the opposition's boundary lines and as players passed it between themselves, trickery was the order of the day. The game remained popular for 700-800 years, but, although the Romans took it to Britain with them, the use of feet was so small as to scarcely be of consequence.

Rules and Regulations

1. Ball in and out of Play

The soccer ball is out of bounds when it has crossed the goal line or touchline whether on the ground or in air. If it rebounds off the referee, an assistant referee, a goal post, crossbar, or corner flag post and remains inside the field, then it is still in play.

2. Method of scoring

A goal is scored in football if the ball crosses the goal line between the two goalposts and under the crossbar, as long as no violation of the rules has taken place. The side that scores the most goals wins. If both teams have the same number of goals at the end of the match, it is considered a draw even if neither of them scored a goal.

3. Offside

A player is in offside position if there are fewer than two defenders (including the goalie) between him and the goal line. A violation of the offside rule in football occurs if he is in that position and the ball is played to him.

Appendix C: Individual Statement

Student Name:	Nisheanthan Karthikeyan	Student Id:	W17154156
State what tasks you carried out in the project.			
<ul style="list-style-type: none">1. Quiz page with 10 MCQ Questions.2. Team Member Details with their images and details when hover3. Individual page – About Football4. Designed CV			
State what you enjoyed and did not enjoy about teamwork.			
<p>Enjoyed – Found Friendship when the tasks became harder as time went. Sharing Knowledge</p> <p>Not – Enjoyed – Could not find spare time. (We were always busy)</p>			
State what you learnt about teamwork.			
<p>Learning and Teaching will always help improving the knowledge. Getting to a common decision is always mandatory Each of the suggestions should be considered</p>			
State what skills you gained/learnt from undertaking the project.			
<p>Working under pressure and deadline Negotiations with peers.</p>			
State any strengths about yourself that emerged whilst undertaking the project.			
<p>I can spend a lot of time on designing to make sure all like the page.</p>			

State any weaknesses about yourself that emerged whilst undertaking the project.

Selecting the tasks associated with members. (Could not find out which suits me more on specified tasks).
Did not know anything about UI & UX principle

State how you would do things better if you were to undertake the project again.

Will Start work earlier and finished earlier.
More functionality to keep user interactive with pages.
Would work with more clear UI & UX principles

Additional general or project specific comments:

Few things was not clear, we needed to contact course leader often.
